- **DOMINATOR GEL DEEP CYCLE SERIES HAS EXTRA PROTECTION AGAINST DEEP DISCHARGING**

Ultra-deep discharging is what causes life-shortening plate shedding and accelerated positive grid corrosion, which can destroy a battery. DOMINATOR deep cycle batteries are designed to use the optimized amount of acid (no more, no less). This means that the power in the acid is used before the power in the plates. This design, along with the enhanced durability in the glass mat and plate construction, protects the internal components from ultra-deep discharges

**DOMINATOR**

## **DOMINATOR® GEL Series for MARINE EXTREME DEEP CYCLE/ STARTING**

- Longest deep cycle life
- Ultimate trolling and accessory power performance
- Superior protection against vibration and deep cycle damage
- Better capacity protection during periods of infrequent use
- Safer install and transport with no-spill design to prevent leaking acid
- Dependable starting performance

Dominator's unique gelled electrolyte technology offers some of the deepest cycling batteries in the marine industry. Our Gel design is built to withstand the heavy multiple charging and recharging service demanded by heavy house power or extended trolling needs.

These evolutionary maintenance-free batteries deliver dependable performance cycle after cycle while providing longer battery life, even under the toughest marine conditions. Their spillproof design and minimized gassing makes them safe to use on or around sensitive electronic equipment.

INNOVATIVE GEL TECHNOLOGY
